---

## SUMMARY

---

Backend-focused PHP Developer with 4 years of experience building secure, scalable web applications using Laravel. Strong experience designing and developing RESTful APIs, structuring clean and maintainable backend architecture, and optimizing database performance with MySQL and PostgreSQL. Comfortable working on product-based and service-based applications and collaborating closely with frontend and DevOps teams to deliver reliable, production-ready solutions. Known for clean code practices, thoughtful refactoring, and a strong sense of ownership over backend systems.

---

## EXPERIENCE

---

### Sr. Lead Software Engineer

Logix Built Solution LTD

December 2021 - Present, Surat

- Architected and maintained scalable backend systems using **PHP 8+ and Laravel (8, 10, 11)** across service-based clients and in-house products.
- Designed and optimized **RESTful APIs** with a strong focus on security, performance, and multi-consumer support.
- Strengthened backend architecture through **database optimization (MySQL, PostgreSQL)** and effective **caching strategies**.
- Enforced **clean code standards and SOLID principles**, leading refactoring efforts to improve long-term stability and maintainability.
- Partnered with frontend, DevOps, and product teams while **mentoring developers** through reviews and technical guidance.
- Supported production deployments using **AWS and Docker**, and implemented **extensive PHPUnit test coverage** integrated with CI/CD pipelines.

### Web Developer Intern

Olcademy

May 2021 - August 2021, Delhi (Remote)

- Collaborated with 4+ cross-functional teams to integrate APIs and services across multiple components, improving overall system interoperability by 30%.
  - Reviewed and resolved 100+ customer-reported bugs, improving system stability and customer satisfaction by 20%.
  - Participated in 50+ code reviews, identifying critical issues and contributing to a 15% reduction in post-deployment defects.
  - Developed Pest unit test suite for 5 major features over 6-month internship, increasing code coverage by 28% and reducing QA cycle time by 18% via automated testing in Laravel environment.
- 

## PROJECT

---

## Heroic – Cybersecurity Platform

Logix Built Solution LTD • [app.heroic.com](https://app.heroic.com) • September 2024 – December 2025

- Developed and maintained backend functionality using **Laravel 11**, focusing on scalable, maintainable architecture.
- Refactored and restructured legacy modules, migrating **HTML/AJAX/JavaScript implementations** to **Livewire 3** and **Alpine.js**.
- Re-implemented backend business logic to improve code organization, performance, and long-term maintainability.
- Built and managed administrative workflows using **Laravel Nova 4**.
- Implemented secure data handling and notification logic for identifying and alerting users about breached information.
- Collaborated with product teams to evolve a security-focused platform using clean code and best practices.

## US Will Registry – Secure Estate Planning Web Platform

Logix Built Solution LTD • [www.theuswillregistry.org/](https://www.theuswillregistry.org/) • May 2023 – August 2024

- Designed and developed **RESTful APIs from scratch** using **PHP and Laravel**, supporting a **React-based frontend with multiple application modules**.
- Implemented backend architecture following **clean code and modular design principles**, reducing code duplication and simplifying ongoing feature development.
- Built secure API workflows to handle **sensitive legal and personal data**, enforcing authentication and access control across **all protected endpoints**.
- Supported a **searchable registry** by implementing optimized backend logic and **audit-friendly logging** to ensure reliability and traceability.

---

## EDUCATION

### Master of Computer Applications – MCA

Dr. Vishwanath Karad MIT WORLD PEACE UNIVERSITY • Pune, Maharashtra, India • 2022 • 9.6

### Bachelor of Computer Applications – BCA

SDJ International College • Surat, Gujarat, India • 2019 • 7.8

---

## SKILLS

Frontend (Working Knowledge)

• Vue.js | Livewire | React.js | Tailwind CSS | Bootstrap

Backend & Languages

• PHP 8+ | Laravel 8 | Laravel 10 | Laravel 11

• | RESTful API Development | Social Login Integrations | Twilio (SMS & VoIP) | Firebase APIs | Google Maps API

Databases & Caching

• MySQL | PostgreSQL | Redis | Database Design & Query Optimization | Caching Mechanisms

Payment Integration

• PayPal | Stripe | Razorpay | Authorize.net

QA & Testing Expertise

- Manual Testing | Automated Testing | Performance Testing | Security Testing | Usability Testing

Tools & Collaboration

- Git | GitHub | GitLab | Bitbucket | Jira | Trello | Asana | Slack
-
